

MOHAMED RASHED ABDELAZIM

Full-Stack .NET Developer | ASP.NET Core, C#, EF Core, SQL Server | AI-Assisted Development

Cairo, Egypt • +20 120 002 0875 • mrashed19951995@gmail.com • eg.linkedin.com/in/mohamed-rashed-642248283 • github.com/MohamedRashed1995

PROFESSIONAL SUMMARY

Full-Stack .NET Developer with 2+ years of experience designing and delivering secure, scalable web applications and RESTful APIs using ASP.NET Core, C#, Entity Framework Core, and SQL Server, complemented by frontend development with JavaScript, Bootstrap, and jQuery — including a 40+ table, 200+ endpoint backend built for a production educational subscription platform. Proven track record integrating payment gateways (Paymob), implementing JWT-based authentication and role-based access control, and applying Clean Architecture and SOLID principles across web applications spanning education, healthcare, and e-commerce domains. Complements core engineering expertise with active experience in AI model evaluation and prompt engineering, bridging traditional software development with emerging AI-assisted workflows.

TECHNICAL SKILLS

Backend Development: C#, ASP.NET Core, .NET 6/7/8, ASP.NET Core Web API, RESTful API Design, Entity Framework Core, LINQ, Dependency Injection

Databases: SQL Server, Database Design, EF Core Migrations, Query Optimization, Indexing

Security & Authorization: JWT Authentication, Role-Based Access Control (RBAC), Authorization Policies

Architecture & Practices: Clean Architecture, SOLID Principles, Repository Pattern, Object-Oriented Programming, API Design

Frontend: HTML5, CSS3, JavaScript (ES6+), Bootstrap, jQuery, Responsive UI Development

Integrations: Paymob Payment Gateway, Third-Party REST API Integration

AI & Emerging Tech: Prompt Engineering, LLM Output Evaluation, AI-Assisted Development, AI Code Review, AI-Generated UI Prototyping

Tools & Methods: Git, GitHub, Postman, Swagger, Visual Studio, Azure Fundamentals, Jira, Agile/Scrum, CI/CD Basics

PROFESSIONAL EXPERIENCE

Full-Stack .NET Developer | Bright Marketing

Cairo, Egypt (Remote) • May 2025 – Apr 2026

Tech Stack: C#, ASP.NET Core, Entity Framework Core, SQL Server, JWT, Paymob API, Jira

- Delivered end-to-end backend systems for multiple client projects — Adros (educational subscription platform), Dentzone (healthcare), and Abu Hamda (e-commerce) — covering data modeling, API development, and deployment.
- Implemented JWT-based authentication and role-based access control (RBAC) across client projects, securing access for 3 distinct user roles per system.
- Integrated the Paymob payment gateway end-to-end for the Adros platform, enabling secure, real-time subscription payment processing.
- Applied Entity Framework Core query optimization, indexing strategies, and Clean Architecture/SOLID principles across client projects to improve performance, maintainability, and developer onboarding.
- Contributed to Agile sprint planning and backlog management via Jira, supporting iterative delivery across concurrent client projects.

AI Prompt Writer & Specialist | Outlier

Remote • Oct 2024 – Present (Part-time, Ongoing)

Tech Stack: C#, .NET, JavaScript/HTML/CSS, LLM Evaluation Frameworks

- Engineered and evaluated technical prompts for Large Language Models, assessing reasoning quality, technical accuracy, and instruction adherence across C#, .NET, and frontend tasks.
- Reviewed AI-generated code submissions for correctness and best-practice compliance, identifying and documenting technical and logical issues across each review cycle.
- Authored structured test cases and evaluation rubrics used to benchmark LLM performance on backend and API development tasks.
- Maintained consistent quality and turnaround standards working independently in a fully remote, asynchronous environment.

IT Administrator & Front-End Developer | Larins Fashion Trade

Cairo, Egypt • Jan 2024 – Jul 2024

Tech Stack: Shopify, HTML5, CSS3, JavaScript, Networking, MCSA

- Built and customized Shopify-based e-commerce storefronts while serving as IT Administrator and ERP System Manager, handling company-wide hardware, networking, help desk, and security operations.
- Resolved recurring frontend and platform-level technical issues, reducing customer-facing display errors and downtime.
- Streamlined the storefront customization workflow to reduce average page-update turnaround time.

IT Support Specialist | National Company

Cairo, Egypt • Jun 2022 – Jun 2023

Tech Stack: Windows OS, Networking Fundamentals, Hardware Diagnostics

- Diagnosed and resolved hardware, software, and networking incidents on a daily basis, maintaining a high first-contact resolution rate.
- Investigated recurring technical issues and implemented preventive fixes to reduce repeat-ticket volume.
- Supported enterprise end-users across the organization, ensuring minimal disruption to daily operations.

FEATURED PROJECTS

HelpDesk Final System | github.com/MohamedRashed1995/HelpDeskFinal

Tech Stack: ASP.NET Core, Entity Framework Core, SQL Server, JWT, Clean Architecture

- Designed and developed a full-stack HelpDesk ticketing system managing the complete ticket lifecycle across 3 user roles (Admin/Agent/Client).
- Built RESTful API endpoints with Swagger documentation, applying Clean Architecture and the Repository Pattern for JWT-secured, role-based ticket assignment and status workflows.
- Documented full project requirements (PRD/BRD, WBS) and managed delivery via Jira and GitHub.

Adros Educational Platform | github.com/MohamedRashed1995/Adros_Backend_Rashed

Client project delivered during tenure at Bright Marketing

Tech Stack: ASP.NET Core, Entity Framework Core, SQL Server, JWT, Paymob API

- Designed and developed the backend for a subscription-based educational platform spanning 40+ database tables, exposing 200+ RESTful API endpoints for users, content, and subscriptions.
- Integrated the Paymob payment gateway to enable secure, end-to-end online subscription payments.
- Implemented JWT authentication and role-based access control across 3 distinct user types.

Dentzone API & Platform | github.com/MohamedRashed1995/Dentzone-API

Client project delivered during tenure at Bright Marketing

Tech Stack: ASP.NET Core, Entity Framework Core, SQL Server, Clean Architecture

- Designed a healthcare backend managing patients, appointments, and clinic workflows across a multi-table SQL Server schema with dedicated services and repositories per domain entity.
- Applied Clean Architecture and SOLID principles with role-based access control across 3 user roles, improving testability and long-term maintainability.

Abu Hamda E-Commerce Platform

Client project delivered during tenure at Bright Marketing — partial backend contribution

Tech Stack: ASP.NET Core, Entity Framework Core, SQL Server

- Contributed a subset of backend API endpoints for an e-commerce platform, integrating with the team's existing Clean Architecture structure to support product and order-related functionality.

EDUCATION

Bachelor of Computer Science — Ain Shams University

PROFESSIONAL TRAINING & CERTIFICATIONS

ASP.NET Full Stack Certificate — CLS Center • Jul 2024 – Jan 2025

Next Path Professional Program — iCareer / Plan International • 2026

LANGUAGES

Arabic: Native English: Professional Working Proficiency
